**Subject:** Oxford County Water / Wastewater Master Plan

\*\*\* Exercise Caution. This is an EXTERNAL e-Mail, DO NOT open attachments or click links from unknown senders or unexpected mail. \*\*\*

Good Afternoon,

Please be advised that Oxford County Council, at its meeting held on July 12, 2023, adopted the following resolution in relation to Council Report No. PW 2023-33, entitled "2024 Water / Wastewater Master Plan":

1. Resolved that the recommendations contained in Report No. PW 2023-33, titled "2024 Water and Wastewater Master Plan", be received as information;
2. And further, that the draft report be circulated to Area Municipalities requesting their feedback within 75 days (September 25, 2023);
3. And further, that the draft report be posted to Speak Up Oxford for feedback from the public for 75 days (September 25, 2023);
4. And further, that all comments received be provided in a report for council's consideration when considering the draft report.

You are welcome to include the attached County Council Report and Amended Resolution as formal correspondence as information to your respective Councils.

Based on the above resolution, any further written informal comments with respect to the Water / Wastewater Master Plan can be forwarded to Mackenzie Schultz, Supervisor of Water/Wastewater Technical Services, ([mschultz@oxfordcounty.ca](mailto:mschultz@oxfordcounty.ca)), **no later than September 25, 2023.**

The final draft Water / Wastewater Master Plan report can be viewed [here](#) on our Speak Up, Oxford! page.

Thank You,

David

**DAVID SIMPSON, P.Eng., PMP** (HE/HIM)  
Director of Public Works, OXFORD COUNTY T 519.539.9800 ext 3100

**To:** Warden and Members of County Council  
**From:** Director of Public Works

**See amended  
resolution**

## 2024 Water and Wastewater Master Plan

### RECOMMENDATIONS

---

1. That County Council endorse, in principle, the draft 2024 Water and Wastewater Master Plan as the recommended servicing strategies to meet Oxford's growth needs to 2046 as well as provide effective on-going continuity to existing serviced settlement areas;
2. And further, that County Council direct Staff to file a Notice of Completion and commence the 45-day public review period as required under the Municipal Class Environmental Assessment (MCEA) process.

### REPORT HIGHLIGHTS

---

- The purpose of this report is to seek County Council's endorsement, in principle, of the draft 2024 Water and Wastewater Master Plan (W/WW MP) which provides a strategic roadmap to service existing needs and accommodate future growth.
- The draft 2024 W/WW MP identifies water and wastewater infrastructure requirements to accommodate projected population and employment growth to 2046 in accordance with the 2020 Provincial Policy Statement and the County's approved Phase I Comprehensive Review (2020), while ensuring service continuity to existing serviced settlement areas. This approach strategically focuses future growth and development primarily in designated community settlement areas (i.e. existing areas that are currently fully or partially serviced).
- The draft 2024 W/WW MP is centered around several key servicing strategies to address risk and capacity considerations, including: optimization of existing infrastructure, new well supplies, water/wastewater treatment plant expansions, extensions of existing water distribution / wastewater collection systems, system redundancy projects, water conservation and sewer system inflow and infiltration reduction.
- A comprehensive public consultation and engagement campaign was undertaken throughout the Master Plan as per the MCEA process. The process involved Community Members, Area Municipalities, Review Agencies, Indigenous Communities, public interest groups, businesses and other stakeholders. Following the potential issuance of the Master Plan Study Notice of Completion, the final consultative stage will include a 45 day review opportunity for all interested parties to comment on the draft W/WW MP Study Report.

## **Implementation Points**

Upon Council approval, staff will proceed to issue and file a Notice of Completion for the draft 2024 W/WW MP. Copies of the final draft of the Master Plan Study Report will be available upon request as well as posted to the Oxford County website and online engagement hub at *Speak Up, Oxford!*.

Following a 45 day public review period and subject to comments received, the 2024 W/WW MP Class Environmental Assessment (Class EA) Study Report can be finalized and filed.

It is recognized that the 2024 W/WW MP proceeded under Approach 1 of the MCEA process and does not address MCEA requirements for Schedule B and Schedule C projects. Class EA Studies for these applicable projects, as identified in the W/WW MP, will be carried out in greater detail in the future at which time the public, agencies, and Indigenous Communities will be provided an opportunity for ongoing review and comment on the same.

## **Financial Impact**

There are no financial impacts to the 2023 Business Plan and Budget based on the recommendations contained within this report.

Once finalized, the 2024 W/WW MP will become an input to the County's 2024 Water and Wastewater Development Charges Technical Study which will inform the upcoming 2024 Development Charges Background Study. It is anticipated that the approved growth forecast to 2046 and associated capital implementation plan may be further refined through the ongoing 2024 Development Charges process.

Future implementation of projects identified in the 2024 W/WW MP will be considered by County Council through the annual budgeting process to which approved projects will be integrated within the County's 2022 Asset Management Plan which focuses on lifecycle needs of existing projects and incorporates the needs of growth projects identified in the Development Charges Background Study.

Increases to the level of services provided, or addition of new services, are not explicitly accounted for within the annual contribution to reserves. It is likely that additional funding and staff resourcing will be required to implement all projects identified in the W/WW MP, including the use of long-term debenture funding, increases to rates and possible prioritization of service projects over lifecycle projects to accommodate funding limitations. Staff will seek out additional funding opportunities wherever possible.

## **Communications**

As noted in Report No. [PW 2022-47](#), an extensive public consultation and engagement program was carried out during the development of the 2024 W/WW MP in order to provide meaningful opportunities for public, Indigenous Communities and stakeholder input. The feedback and input received has been summarized in the draft 2024 W/WW MP Study Report.

The community engagement around the 2024 W/WW MP was undertaken through a range of tools to seek feedback from Oxford's various communities and demographics as follows:

- **Speak Up, Oxford!** This serves as the engagement hub for consultation. It was published in March 2022, with 2300 total visits to the site since its launch.
- **Feedback surveys and question form:** Together, the interactive tools solicited input from 94 visitors who reviewed information or participated in feedback forms (surveys) and/or a questions tool. There were also 583 downloads of documents (public notices, Public Consultation Centre presentations).
- **Public Consultation Centre (PCC) #1:** Taking place on September 29, 2022, this event drew approximately 10 participants for a nearly one and a half hour discussion.
- **PCC #2:** Took place on June 27, 2023, this event drew approximately 25 participants over a nearly two-hour discussion.
- **"Pop-up" events:** These in-person events provided an opportunity for members of the public to speak directly with the project team during the first consultation window, including Canada's Outdoor Farm Show (September 14, 2022), Tillsonburg Ribfest (September 23 and 24, 2022), Ingersoll Town Council Chamber (September 26, 2022).
- **Print advertising:** For audiences that prefer to receive news through newspapers and community publications, information on how to provide input was outlined in 28 **print ads** and **public notices** during the consultation period. Publications encompassed the *Oxford Review*, *Norfolk-Tillsonburg News*, *Woodstock Sentinel Review*, *Ayr News*, *Wilmot-Tavistock Gazette*, *St. Marys Independent*, *What's On Woodstock* and *Village Voice Oxford* editions.
- **Digital (web) and social media ads:** There was extensive online advertising throughout both consultation phases encompassing Facebook and Instagram for social media and digital advertising on popular websites geo-targeted to Oxford County residents. "Organic" (non-paid) postings on the County's social media pages has been ongoing.
- **Media:** A **news release** and posts to the Oxford County **website** were performed.
- **Stakeholder consultation meetings:** Sessions with Area Municipalities, community partners and other key stakeholders ensured such parties were informed about the process and were given opportunity to provide input.

Overall, feedback received through the public consultation and engagement campaign indicated general support for the 2024 W/WW MP strategy. The feedback centered on water and wastewater system service provisions, feasibility and cost effectiveness related to the following topics:

- Drinking water quality improvements (aesthetic);
- Water and wastewater servicing reliability;
- Changing servicing demands and infrastructure expansion (growth considerations);
- Water conservation programs and initiatives;
- Wastewater and water treatment enhancements; and
- Climate change resiliency.

Report No. PW 2023-33 will be circulated to Area Municipalities for information.

**Strategic Plan (2020-2022)**

					
<b>WORKS WELL TOGETHER</b>	<b>WELL CONNECTED</b>	<b>SHAPES THE FUTURE</b>	<b>INFORMS &amp; ENGAGES</b>	<b>PERFORMS &amp; DELIVERS</b>	<b>POSITIVE IMPACT</b>
1.ii.		3.iii.	4.i. 4.ii.	5.ii.	

**DISCUSSION**

**Background**

As noted in Report No. PW 2022-47, the draft 2024 W/WW MP was developed as a strategic planning document which prescribed Oxford County’s comprehensive long-term water and wastewater servicing strategies that will support existing needs and accommodate future growth in population and employment through to the year 2046 in accordance with the 2020 Provincial Policy Statement and the County’s approved Phase I Comprehensive Review (2020).

The draft 2024 W/WW MP was undertaken in accordance with the MCEA process for Master Plans (Appendix 4, Approach #1 of the MCEA, October 2000, as amended in 2007, 2011, 2015 and 2023). Accordingly, the draft 2024 W/WW MP considered all reasonable water and wastewater servicing alternatives and developed a preferred alternative that offered the lowest potential impacts on the natural, cultural, social and economic environment of the community.

In addition to the social, cultural, economic and environmental considerations, focus was placed on sustainability, constructability, operability and service integration with other existing or future water, wastewater and road infrastructure projects. The alternative water and wastewater servicing strategies were assessed for the greatest utility and potential impacts using the evaluation criteria framework shown in Table 1.

**Table 1: Water and Wastewater Servicing Evaluation Criteria**

<b>Category</b>	<b>Criteria</b>
<b>Technical</b>	<ul style="list-style-type: none"> <li>• Constructability</li> <li>• Improvement to operations</li> <li>• Infrastructure required</li> <li>• Approval requirements</li> <li>• Risk mitigation– regulatory, supply security, climate change, etc.</li> </ul>
<b>Social and Cultural</b>	<ul style="list-style-type: none"> <li>• Public acceptance</li> <li>• Impact to cultural heritage infrastructure and landscapes</li> <li>• Impact to archaeological infrastructure and resources</li> </ul>
<b>Environmental</b>	<ul style="list-style-type: none"> <li>• Impact to aquatic and terrestrial species and habitat</li> <li>• Impact to surface water quantity and quality</li> <li>• Impact on climate change</li> </ul>
<b>Economic</b>	<ul style="list-style-type: none"> <li>• Capital costs</li> <li>• Operation and maintenance costs</li> <li>• Allows for planned community growth</li> </ul>

## Comments

### Preferred Servicing Strategies

Following review of opportunities and constraints across Oxford County's 17 municipal drinking water systems and 11 wastewater systems, the need to develop alternative servicing concepts and strategies were based on ensuring that there is sufficient treatment and transmission capacity available in time to service projected growth as well as sustain service to existing residents and businesses.

Of note, the draft 2024 W/WW MP was established to service growth and development that was focused within designated settlement areas, including fully serviced (municipal) large urban centers and villages as well as partially serviced (municipal) villages. The draft 2024 W/WW MP was directed to assume that any current privately serviced (well and/or septic) villages and/or rural clusters will remain on such servicing given that County approved growth was limited to minor infilling in those areas.

The preferred water and wastewater strategies were developed with the intent to:

- Optimize and maximize the available capacity in existing infrastructure before adding new infrastructure that may be required for additional treatment or transmission capacity;
- Provide reliability, redundancy and security in the infrastructure systems;
- Develop infrastructure systems which meet the MECP legislative requirements, best management practices and County's established asset level of service framework;
- Utilize proven, reliable, and financially sustainable technologies;
- Recognize water conservation and sewage system infiltration reduction measures which support environmental sustainability;
- Optimize pumping and storage infrastructure to maintain level of service under emergency conditions and extreme weather events; and
- Offer infrastructure solutions that recognize potential for growth beyond current planning horizons.

A high-level executive summary of the draft 2024 W/WW MP strategies, associated key actions and implementation plan is provided in Attachment 1. The complete final draft W/WW MP Report can be viewed on W/WW MP project webpage at <https://speakup.oxfordcounty.ca/wwwmp>.

### Preferred Water Servicing Strategy and Projects

The preferred water servicing strategy involves extending existing water distribution systems (watermain extensions, new booster pumping stations, new storage facilities) to service infill areas and employment lands, optimizing existing well supply yields, expanding existing water treatment plant capacities, developing new well supplies, ongoing source water protection initiatives and continuing water conservation best management practices.

The preferred water servicing strategy has identified numerous water capital projects which are required to service existing needs and anticipated growth in Oxford County. The overall water capital program from 2024 to 2046 has been estimated to be approximately \$245 million (2023 dollars).

Below is a list of significant water projects for various County drinking water systems (DWS) anticipated for implementation over this timeframe:

**Township of Blandford-Blenheim**

- *Drumbo DWS* – Standby power to existing wells, trunk watermain extensions/upsizing, new well supply, new water treatment plant with filtration
- *Plattsville DWS* – Water treatment plant filtration upgrades, new well supply
- *Bright DWS* - Plattsville to Bright water system interconnection, Well 5 decommissioning

**Township of East Zorra-Tavistock**

- *Tavistock DWS* – New Well Supply, New Treatment Plant with Onsite Water Storage, Trunk watermain extensions/upsizing, Water Treatment Plant Filtration Upgrades, Water Tower Rehabilitation
- *Innerkip DWS* – Water Infrastructure Refurbishment
- *Hickson DWS* – Water Infrastructure Refurbishment

**Township of Zorra**

- *Embro DWS* – New Water Storage, Reservoir disinfection (contact time) alterations, water storage enhancements
- *Thamesford DWS* – Trunk watermain extensions, Reservoir disinfection (contact time) alterations
- *Lakeside DWS* – Water Infrastructure Refurbishment

**Township of South-West Oxford**

- *Mount Elgin DWS* – Water Treatment Plant Optimization, Ingersoll to Mount Elgin Water System Interconnection
- *Beachville DWS* – New Well Supply and Water Storage
- *Brownsville DWS* – Water Quality Improvements, Water Treatment Plant Filtration Addition
- *Dereham Centre DWS* – Water Infrastructure Refurbishment

**Township of Norwich**

- *Norwich-Otterville-Springford DWS* – Norwich Water Treatment Plant Filtration and Storage

**Town of Tillsonburg**

- *Tillsonburg DWS* – Upgrades to Wells 3 and 6A Treatment Facilities (Off-line), Well 7A Filtration Upgrades, Replacements of Wells 1A and 2, Standby Power, Water Storage Expansion, Trunk watermain extensions/upsizing, Source Water Protection

**Town of Ingersoll**

- *Ingersoll DWS* - Trunk watermain extensions/upsizing, New Booster Pumping Station, New Elevated Water Storage, Water Quality Improvement Pilot (taste / smell)

**City of Woodstock**

- *Woodstock DWS* – Standby Power, Southside Water Treatment Plant Replacement, Feedermain Twinning, Upgrades to Wells 6 and 9, Trunk watermain extensions/upsizing, New Water Booster Pumping Stations, Pressure Zone Boundary Adjustments, Source Water Protection

## Preferred Wastewater Servicing Strategy and Projects

The preferred wastewater servicing strategy involves expanding existing wastewater collection systems (sewer mains extensions, new/upsized forcemains, new/upgraded sewage pumping stations) to service infill areas and employment lands, rehabilitating aging trunk sewers, expanding existing water treatment plant capacities and initiating sewer system inflow and infiltration reduction best management practices.

The preferred wastewater servicing strategy has identified numerous wastewater capital projects which are required to service existing needs and anticipated growth in Oxford County. The overall wastewater capital program from 2024 to 2046 has been estimated to be approximately \$329 million (2023 dollars). Below is a list of significant wastewater projects for various County wastewater systems (WWS) anticipated for implementation over this timeframe:

### **Township of Blandford-Blenheim**

- *Drumbo WWS* – Wastewater Treatment Plant Capacity Expansion (Phase 2), Standby power to SPS locations
- *Plattsville WWS* – Wastewater Treatment Plant Optimization, Lagoon biosolids removal and berm repair, Trunk sewer extensions, forcemain twinning and capacity review

### **Township of East Zorra-Tavistock**

- *Tavistock WWS* – Wastewater Treatment Plant Capacity Expansion (Phase 2), Sewage Pumping Station Capacity Upgrades, Trunk sewer extensions/upsizing, Sewer System Inflow and Infiltration Reduction
- *Innerkip WWS* – Upsizing/Twinning of Forcemain to Woodstock

### **Township of Zorra**

- *Embro WWS* – Sewage Pumping Station Capacity Upgrades, Upsizing/Twinning of Forcemain to Woodstock
- *Thamesford WWS* – Wastewater Treatment Plant Upgrades

### **Township of South-West Oxford**

- *Mount Elgin WWS* – Wastewater Treatment Plant Capacity Expansion (Phase 3 / 4), Ingersoll to Mount Elgin Wastewater System Interconnection (Forcemain)

### **Township of Norwich**

- *Norwich WWS* – Wastewater Treatment Plant Capacity Expansion (Phase 2), Lagoon biosolids removal and berm repair

### **Town of Tillsonburg**

- *Tillsonburg WWS* – Wastewater Treatment Plant Capacity Expansion (Phase 2), Trunk sewer rehabilitation, Upgrades to Sewage Pumping Stations, Forcemain Upgrades, Trunk sewer extensions/upsizing

### **Town of Ingersoll**

- *Ingersoll WWS* - Trunk sewer extensions/upsizing, New Sewage Pumping Stations, New Forcemains, New Trunk sewer river crossing, Wastewater Treatment Plant Upgrades

### **City of Woodstock**

- *Woodstock DWS* – Trunk sewer extensions/upsizing, New Forcemains, New/Upgraded Sewage Pumping Stations, Wastewater Treatment Plant Upgrades, Brick Pond Trunk sewer realignment, Sewer Inflow and Infiltration Reduction

## **Conclusions**

As part of integrated growth management in Oxford County, the water and wastewater servicing strategies and identified infrastructure projects will accommodate the servicing needs in accordance with the County's approved Phase I Comprehensive Review (2020) growth forecast. Further, the preferred servicing strategies will enhance existing system needs and reliability of water and wastewater servicing provisions for existing County residents and businesses.

All project needs have been incorporated in the County's water and wastewater multi-year capital implementation plan to 2046, at a total estimated cost of approximately \$574 million between the years of 2024 and 2046 (~ \$25 million annually).

It is anticipated that the approved growth forecast to 2046 and associated capital implementation plan may be further refined through the ongoing 2024 Development Charges process.

## 1.0 INTRODUCTION

The County of Oxford (“the County”) has commenced a Water and Wastewater Master Plan (W/WW MP) in order to develop, evaluate and determine a long term water and wastewater approach to manage current servicing needs as well as accommodate future projected population and employment growth to the year of 2046.

### 1.1 Background

The County owns 17 municipal drinking water systems and 11 municipal wastewater systems which includes, but is not limited to, approximately 735 km of distribution watermains, 34 water treatment plants, 42 water reservoirs/storage towers, 6 water booster stations, 61 active groundwater supply wells, 600+ km of sewers and forcemains, 36 sewage pumping stations, 9 wastewater treatment plants, SCADA systems, 4 bulk water stations and a biosolids management facility.

The County holds full municipal authority and is responsible for all water and wastewater system services, including water treatment, wastewater treatment, water distribution and wastewater collection, as per Section 11(11) of the Municipal Act, 2001.

### 1.2 Master Plan Goals

The following goals were developed for the W/WW MP:

1. Provide water and wastewater strategies to service existing settlement areas and growth to the year 2046;
2. Develop water and wastewater strategies that are consistent with and conform to Provincial policies/legislation and support the County’s Official Plan and strategic initiatives;
3. Identify options for optimizing the effectiveness of the existing water and wastewater infrastructure; and
4. Develop an integrated multi-year water and wastewater capital implementation plan which affords infrastructure reliability, redundancy and sustainability.

### 1.3 Study Area

The Study Area below incorporates the County’s entire geographical region which includes its eight Area Municipalities - Township of Blandford-Blenheim, Township of East Zorra-Tavistock, Town of Ingersoll, Township of Norwich, Township of South-West Oxford, Town of Tillsonburg, City of Woodstock, and Township of Zorra. The Study Area is made up of rural areas, settlement clusters and smaller urban centres which cover approximately 2,000 km<sup>2</sup> as shown in Figure ES-1.1.

In order to provide the necessary land use planning and servicing basis for the settlement expansions that are required to accommodate this growth, the County and some Area Municipalities have recently initiated and/or completed a number of Secondary Plans. The Secondary planning processes are shown in Figure ES-1.2.

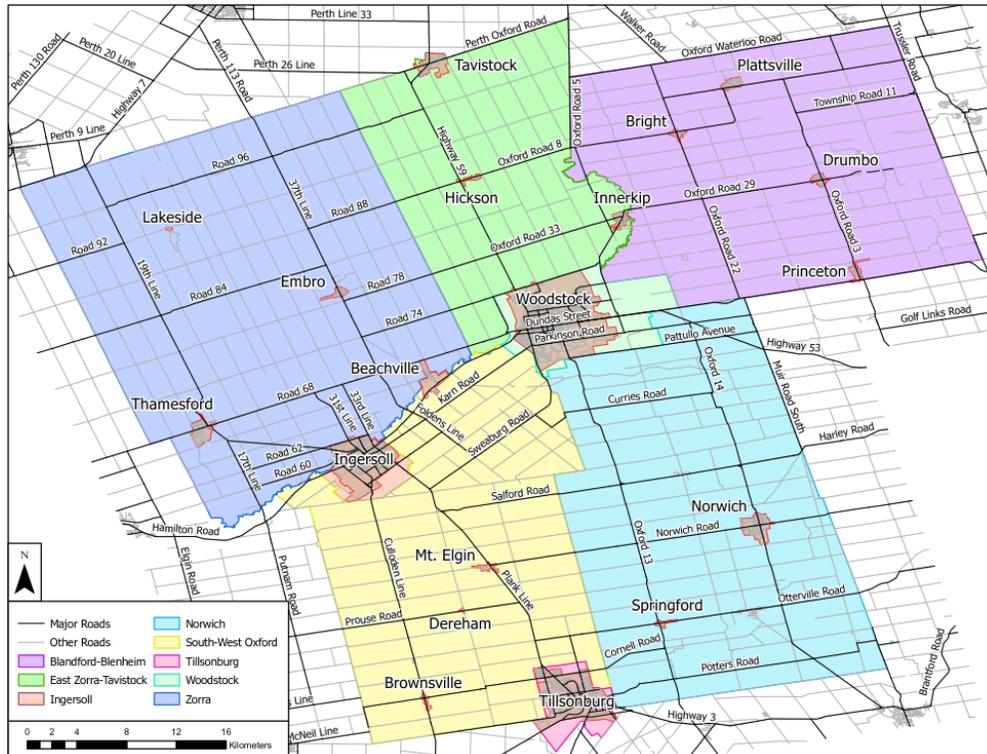

Figure ES-1.1: Water and Wastewater Master Plan Study Area

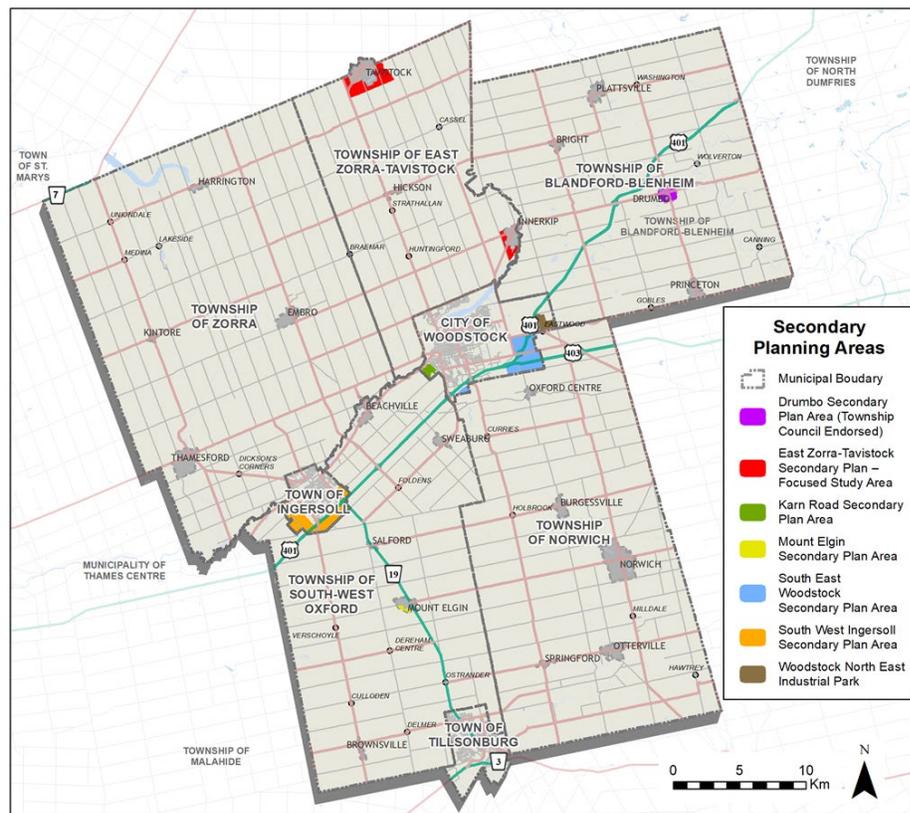

Figure ES-1.2: Oxford County's Secondary Planning Areas

## 2.0 MASTER PLANNING PROCESS

### 2.1 Class Environmental Assessment and Master Plan Process

The Master Plan process provides the basis for developing long-range water and wastewater servicing plans which integrates infrastructure requirements for existing / future land use and evaluates all reasonable servicing alternatives with considerations to natural, social, and economic environments (“triple bottom line”).

In this regard, preparation of the 2024 W/WW MP followed the Municipal Class Environmental Assessment (Class EA) process which is an approved planning and design process under the *Ontario Environmental Assessment Act, 1990*. The W/WW MP was developed following Approach #1 of the Municipal Class EA process which involves a broad scope and a high level of assessment of the projects identified in the Study Area. Projects were identified and classified into schedules based on the type of undertakings and related activities (A, A+, B, C).

The W/WW MP serves to satisfy Phases 1 (identify the problem) and 2 (identify alternative solutions to the problem) of the five-phase Municipal Class EA planning and design process. While the Class EA requirements for Schedule A and A+ were fulfilled through the above approach, other project-specific investigations may be required to satisfy additional Class EA requirements (Phases 3 & 4) before implementation of certain individual projects (i.e. Schedule B and C Class EA Studies).

### 2.2 Problem and Opportunity Statement

The County has defined the following as its statement of the problem/opportunity to be addressed by the W/WW MP:

***“To identify preferred water and wastewater servicing strategies to meet Oxford’s growth needs to 2046 as well as provide effective on-going continuity to existing serviced settlement areas across Oxford County as appropriate.”***

The W/WW MP will afford on-going servicing continuity for the communities (designated as settlement areas in the Oxford County Official Plan), including fully serviced (municipal) large urban centres and villages, which are intended to be the primary focus for future growth and development, as well as partially serviced villages. The W/WW MP was directed to assume that any rural villages that are privately serviced and/or rural clusters will remain on such servicing given growth is limited to minor infilling in these areas.

The 2024 W/WW MP was developed to service planned population and employment growth forecasts to the year 2046 which are based on the approved 2020 Oxford County Phase 1 Comprehensive Review. As part of the water and wastewater servicing assessment, a sensitivity analysis was also undertaken to evaluate the potential impacts of higher than forecasted growth on the County’s water and wastewater infrastructure needs. The purpose of this analysis was to provide the County with additional information and direction necessary to adjust the infrastructure improvement plans to accommodate higher than forecasted growth should it be identified through upcoming forecast updates, or otherwise materialize over the planning period.

### 3.0 PUBLIC CONSULTATION AND ENGAGEMENT

In keeping with the principles of the Municipal Class EA process, the W/WW MP featured a high degree of public and stakeholder involvement. The Class EA process requires stakeholder consultation to incorporate input from interested or impacted groups. Potential stakeholders included but were not limited to public, review agencies, Indigenous Communities, Oxford County Internal staff and Council departments, Area Municipality Councils and staff, and Railways, Transit Agencies, Utilities, etc.

The following summarizes the public announcements and consultation opportunities for public and agency input and participation in the study:

- Notice of Study Commencement in March 2022;
- News releases, radio ads, and social media posts;
- Two virtual Public Consultation Centres, in September 2022 and June 2023;
- Six in person consultation events at Canada's Outdoor Farm Show in Woodstock (September 2022), Ribfest in Tillsonburg (September 2022), Ingersoll Town Council Chambers (September 2022, March 2023), Oxford Council Chambers in Woodstock (March 2023), and Tillsonburg Council Chambers (March 2023);
- Updates and references to the study through the Oxford County website and "Speak-Up Oxford" (<https://oxfordcounty.ca/wwwmp>);
- Five advisory committee meetings with the Internal Technical Review Committee (InTAC) (April 2022, April & May 2023) and External Technical Review Committee (ExTAC) (April 2022, June 2023); and
- Presentations to Oxford County County.

Agencies, stakeholders, and Indigenous Communities were notified at key points in the study process, and they were encouraged to provide any information they felt was necessary for the Project Team to consider during the study. All comments received from agencies, stakeholders and Indigenous Communities were recorded and considered throughout the Master Plan process.

### 4.0 MASTER PLANNING PRINCIPLES

To review the issues and opportunities in the County with regards to water and wastewater servicing to the period to 2046, the following principles shown in the table below were developed by the County.

**Table ES-4.1: Oxford County Water and Wastewater Master Planning Principles**

2024 Water and Wastewater Master Plan
Integrate growth management planning and infrastructure servicing in a manner which ensures alignment with County’s Official Plan and Strategic Initiatives
Offer infrastructure solutions that recognize potential for growth beyond current planning horizons
Develop infrastructure systems which meet the County’s established asset level of service framework and MECP legislative requirements
Maximize the use of available existing capacity in infrastructure, while considering sustainable infrastructure expansions
Provide reliability, redundancy, and security in the infrastructure systems, including consideration of reserve capacity
Optimize pumping and storage infrastructure to maintain level of service under emergency conditions
Recommend proven, reliable, financially, and sustainable technologies that meet long-term servicing requirements
Recognize water conservation and efficiency measures to support environmental sustainability
Consider infrastructure operating and maintenance costs, including full lifecycle costing, to evaluate overall long-term financial implications and sustainability

## 5.0 WATER AND WASTEWATER SERVICING STRATEGY DEVELOPMENT

The process of determining Oxford County’s long term water and wastewater servicing needs involved a number of tasks and evaluation processes that were undertaken as part of the W/WW MP process. Some of the key tasks undertaken included:

- Analyzing planning information and undertaking growth sensitivity analyses;
- Establishing existing system conditions;
- Identifying issues and constraints for each system;
- Developing design criteria and projections of future water demands and wastewater flows;
- Assessing existing and future infrastructure capacity;
- Assessing risk;
- Developing servicing evaluation criteria;
- Developing alternative servicing concepts;
- Evaluating alternative servicing strategies; and
- Determining preferred servicing strategy, implementation, and phasing.

There are potential considerations that will influence the County’s ability to provide water and wastewater services with its current infrastructure and these will have to be considered in planning existing and future works as summarized in Table ES-5.1.

**Table ES-5.1: Summary of Major Water and Wastewater System Considerations**

Water System	Wastewater System
<ul style="list-style-type: none"> <li>• Changes in water quality requirements</li> <li>• Variability in individual well yields</li> <li>• Power Interruptions</li> <li>• Climate Change – lowering of water table</li> <li>• Source water protection – human impacts on water quality and quantity</li> </ul>	<ul style="list-style-type: none"> <li>• Changes to regulated effluent quality</li> <li>• Changes in discharge requirements due to the receiving stream’s assimilative capacity.</li> <li>• Power Interruptions</li> <li>• Climate Change – increased sewer infiltration/inflow, flood levels impacting facilities</li> </ul>

## 6.0 PREFERRED WATER SERVICING STRATEGY

### 6.1 Overall Water Strategy Summary

The preferred water servicing strategy ensures the County’s municipal drinking water systems have adequate water supply, water treatment capacity, sufficient water system storage and pumping/transmission capabilities to the year 2046. The strategy was based on a combination of servicing alternatives which included:

- Optimizing existing well supply and water distribution conveyance infrastructure.
- Extending existing water distribution systems (watermain extensions, new booster pumping stations, new storage facilities, system interconnections) to service infill areas and employment lands.
- Developing new well supplies and expanding existing water treatment plant capacities.
- Ongoing source water protection initiatives and continuation of water conservation best management practices.
- Focusing growth and development within designated settlement areas, including fully serviced (municipal) large urban centers and villages as well as partially serviced (municipal) villages.

Specific alternatives for each drinking water system were then further developed based on the type of issue found within each system as summarized in Table ES-6.1.

**Table ES-6.1: Summary of Solutions Reviewed for Water Issues**

Issues	Servicing Solutions Reviewed
Water Supply	Additional standby production well Interconnection with another system Specialized well rehabilitation Water conservation

Issues	Servicing Solutions Reviewed
Water Treatment	Treatment at well site Treatment at centralized site (multiple wells) Treatment technologies (as applicable)
Water Distribution and Booster Pumping	Refurbish/upsized existing watermains New watermains Refurbish existing or build new BPS/standpipe Revise existing or create new pressure zones
Water Storage	In-ground Storage (and associated BPS) Elevated Storage
Risk	Backup power generation Source water protection and emerging water quality threats System redundancy and reliability

### 6.2 Servicing Requirements by System

As detailed in Table ES-6.2 (located on page ES-13), the preferred water servicing strategy has identified numerous water capital projects which are required to service existing needs and anticipated growth (infill areas, current/future secondary planning areas) in Oxford County to the year 2046. The overall water capital program from 2024 to 2046 has been estimated to be approximately \$245 million (2023 dollars).

Key servicing requirements for each municipal drinking water system (DWS) are as follow:

- **Ingersoll DWS**
  - Trunk watermain extensions/upsizing, New Booster Pumping Station, New Elevated Water Storage, Water Quality Improvement Pilot
- **Tillsonburg DWS**
  - Upgrades to Wells 3 and Well 7A treatment facilities, Replacements of Wells 1A and 2, 6A, and 11, Standby Power, Water Storage Expansion, Trunk watermain extensions/upsizing, Source Water Protection.
- **Woodstock DWS**
  - Standby Power, Southside Water Treatment Plant Replacement, Feedermain Twinning, Upgrades to Wells 6 and 9, Trunk watermain extensions/upsizing, New Water Booster Pumping Stations, Pressure Zone Boundary Adjustments, Source Water Protection.
- **Norwich**
  - **Oxford South DWS (Norwich, Springford and Otterville)**
    - Norwich Well 4 Water Treatment Plant Filtration Upgrades and Storage, New Standby Well supply.

- **Blandford Blenheim**
  - **Drumbo-Princeton DWS**
    - Standby power to existing wells, trunk watermain extensions/upsizing, new well supply, new Water treatment plant with filtration.
  - **Plattsville DWS**
    - Water treatment plant filtration upgrades, New Standby Well supply.
  - **Bright DWS**
    - Plattsville to Bright Water System Interconnection, Well 5 Decommissioning.
- **South-West Oxford**
  - **Mount Elgin DWS**
    - Mount Elgin Water Treatment Plant Optimization, Trunk Watermain Interconnection to Ingersoll Water System.
  - **Beachville DWS**
    - New Standby Well Supply and Water Storage.
  - **Brownsville DWS**
    - Water Quality Improvements, Water Treatment Plant Filtration.
  - **Dereham Centre DWS**
    - Water infrastructure refurbishment
- **East-Zorra Tavistock**
  - **Innerkip DWS**
    - Water infrastructure refurbishment.
  - **Tavistock DWS**
    - New Well Supply, New Treatment Plant with Onsite Storage, Trunk watermain extensions/upsizing, Water Treatment Plant Filtration Upgrades, Water Tower Rehabilitation.
  - **Hickson DWS**
    - Water infrastructure refurbishment.
- **Zorra**
  - **Thamesford DWS**
    - Trunk watermain extensions, Water Reservoir Contact Time Enhancements (reallocation to Storage).
  - **Embro DWS**
    - Water Reservoir Contact Time Enhancements (reallocation to Storage, Water Storage Enhancements at Embro Water Treatment Plant.
  - **Lakeside DWS**
    - Water infrastructure refurbishment.

## 7.0 PREFERRED WASTEWATER SERVICING STRATEGY

### 7.1 Overall Strategy Description

The preferred wastewater servicing strategy ensures the County’s municipal wastewater systems have sufficient wastewater conveyance capabilities and wastewater treatment capacity to the year 2046. The strategy was based on a combination of servicing alternatives which included:

- Optimizing existing wastewater collection and treatment plant infrastructure;
- Extending existing wastewater collection systems (sewer mains extensions, new/upsized forcemains, new/upgraded sewage pumping stations, system interconnections) to service infill areas and employment lands.
- Rehabilitating aging trunk sewers and initiating sewer system inflow and infiltration reduction best management practices.
- Expanding existing water treatment plant capacities.
- Focusing growth and development within designated settlement areas, including fully serviced (municipal) large urban centers and villages as well as partially serviced (municipal) villages.

Specific alternatives for each wastewater system were then further developed based on the type of issue found within each system as summarized in Table ES-7.1.

**Table ES-7.1: Summary of Solutions Reviewed for Wastewater Issues**

Component	Solutions Reviewed
Wastewater Collection and Conveyance	Trunk Sewers and Local Gravity Sewers Sanitary Pumping Station Forcemain Siphon (gravity flow underneath river) Infiltration and Inflow Control and Reduction
Wastewater Treatment	Headworks and Septage receiving facilities Liquid Treatment of wastewater (primary and secondary treatment) Tertiary Treatment (if required) to reduce nutrients in wastewater Wastewater effluent disinfection Biosolids Management (treatment, storage, disposal) Wet weather flow treatment (in some cases)

### 7.2 Detailed Servicing Requirements

As detailed in Table ES-7.2 (located on page ES-23), the preferred wastewater servicing strategy has identified numerous wastewater capital projects which are required to service existing needs and anticipated growth (infill areas, current/future secondary planning areas) in Oxford County to the year 2046. The overall wastewater 2024 - 2046 capital program is estimated at approximately \$329 million (2023 dollars).

Key servicing requirements for each municipal wastewater system (WWS) are as follow:

- **Ingersoll WWS**
  - Trunk sewer extensions/upsizing, New Sewage Pumping Stations, New Forcemains, New Trunk sewer river crossing, Wastewater Treatment Plant Headworks Upgrades.
- **Tillsonburg WWS**
  - Wastewater Treatment Plant Capacity Expansion (Phase 2), Trunk sewer rehabilitation, Upgrades to Sewage Pumping Stations, Forcemain Upgrades, Trunk sewer extensions/upsizing.
- **Woodstock WWS**
  - Trunk sewer extensions/upsizing, New Forcemains, New/Upgraded Sewage Pumping Stations, Wastewater Treatment Plant Upgrades, Brick Pond Trunk sewer realignment, Sewer Inflow and Infiltration Reduction.
- **Blandford Blenheim**
  - **Drumbo WWS**
    - Wastewater Treatment Plant Capacity Expansion (Phase 2), Standby power to SPS locations.
  - **Plattsville WWS**
    - Wastewater Treatment Plant Optimization, Lagoon biosolids removal and berm repair, Trunk sewer extensions, forcemain twinning and capacity review.
- **Norwich WWS**
  - Wastewater Treatment Plant Capacity Expansion (Phase 2), Lagoon biosolids removal and berm repair.
- **South-West Oxford**
  - **Mount Elgin WWS**
    - Wastewater Treatment Plant Capacity Expansion (Phase 3 / 4), Ingersoll to Mount Elgin Wastewater System Interconnection (Forcemain).
- **East-Zorra Tavistock**
  - **Tavistock WWS**
    - Wastewater Treatment Plant Capacity Expansion (Phase 2), Sewage Pumping Station Capacity Upgrades, Trunk sewer extensions/upsizing, Sewer System Inflow and Infiltration Reduction.
  - **Innerkip WWS**
    - Upsizing/Twinning of Forcemain to Woodstock.
- **Zorra**
  - **Thamesford WWS**
    - Wastewater Treatment Plant Upgrades.
  - **Embro WWS**
    - Sewage Pumping Station Capacity Upgrades, Upsizing/Twinning of Forcemain to Woodstock.

### 7.3 Supporting Policy and Strategic Projects

In addition to water and wastewater capital projects identified, a number of supporting policies and strategies were also identified to be developed over the Master Plan period as shown in Table ES-7.3.

**Table ES-7.3: Total Cost of Policy Development and Strategic Projects**

Project Description	1-5 Year	6-10 Year	+10 Year	Total
Fire Rated Systems Policy	\$50,000			\$50,000
Backup Power Prioritization Policy	\$35,000			\$35,000
Servicing Upgrades Policy	\$75,000	\$75,000	\$150,000	\$300,000
Connected Systems Rate Servicing Policy	\$75,000	\$75,000	\$75,000	\$225,000
2029 Water and Wastewater Master Plan	\$450,000			\$450,000
2034 Water and Wastewater Master Plan		\$450,000		\$450,000
2039 Water and Wastewater Master Plan			\$450,000	\$450,000
2044 Water and Wastewater Master Plan			\$450,000	\$450,000
2029 DC W/WW Technical Study		\$100,000		\$100,000
2034 DC W/WW Technical Study		\$100,000		\$100,000
2039 DC W/WW Technical Study			\$100,000	\$100,000
2044 DC W/WW Technical Study			\$100,000	\$100,000
<b>TOTAL</b>	<b>\$685,000</b>	<b>\$800,000</b>	<b>\$1,325,000</b>	<b>\$2,810,000</b>

### 8.0 IMPLEMENTATION

The preferred short and long term water and wastewater servicing strategies will be implemented in accordance with each project’s respective Class EA schedule:

- Schedule A/A+ projects will move directly forward to design and construction based on the designated schedule.
- Schedule B projects identified will proceed through separate stand-alone studies (a Project File Report will be completed for public filing) or as part of an integrated planning process under the Planning Act in order to satisfy Class EA requirements.
- Schedule C projects identified will continue to Phases 3 and 4 of the Class EA process and have an Environmental Study Report (ESR) completed for public filing. It is anticipated that these Schedule C projects will review and update Phases 1 and 2 of the Class EA process as part of the project scope.

During the subsequent steps of project implementation, primarily during detailed design, the following requirements will be considered:

- Finalization of property requirements;
- Refinement of infrastructure alignment, sizing, facility siting and costing;

- Refinement of construction methodologies;
- Completion of additional supporting investigations as required such as geotechnical, hydro-geotechnical and site specific environmental studies;
- Review and mitigation of potential construction related impacts; and
- Completion of all approval requirements including, but not limited to, provincial approvals (MECP, MNR), local municipality approvals (site plans, building permits), and conservation authority approvals.

Given the growth-related nature of the servicing strategies, these capital programs will also form the foundation for the water and wastewater components of Oxford County's Development Charges (DC) By-Law as part of the County's Integrated Growth Management Process shown below. Along with the Water and Wastewater Development Charges Technical Report, the 2024 Water and Wastewater Master Plan provides recommendations, provides supporting information, and identifies the capital requirements for the Oxford County DC By-Law which will be updated for 2024.

The respective projects identified in the 2024 W/WW MP will also provide a baseline for Oxford County's future capital budgets.

Table ES-6.2 - Detailed Water Capital Implementation Plan

Town of INGERSOLL WATER SYSTEM

<b>CAPACITY</b>					
<b>Project ID</b>	<b>Project Description</b>	<b>Cost</b>	<b>2024-2028</b>	<b>2029-2033</b>	<b>2034 - 2046</b>

Municipal Council of the County of Oxford  
Council Meeting - Oxford County

Date: Wednesday, July 12, 2023

---

Moved By: Brian Petrie

Seconded By: David Mayberry

Resolved that the recommendations contained in Report No. PW 2023-33, titled "2024 Water and Wastewater Master Plan", be received as information;  
And further, that the draft report be circulated to area municipalities requesting their feedback within 75 days (September 25, 2023);  
And further that the draft report be posted to Speak Up Oxford for feedback from the public for 75 days (September 25, 2023);  
And further that all comments received be provided in a report for council's consideration when considering the draft report.

DISPOSITION: Motion Carried

*Chloe Senior*
